

Bugs fixed in RTE for 8.0.0 release (Total: 49)

Bug ID	Category	Summary
30990	Compiler	Rounding operators (i.e. floor, ceiling, round and truncate) are unaware of uint or uint64
31151	Compiler	define-C-struct should accept library access
23592	Core	Browser not being reused on Run from IDE
19736	Core	We have "read-bytes-from" but not "write-bytes-to" (or "append...")
31053	Core	untranslated error from surge-browse.exe
32521	Core	Export Curl's RSA public key API
33035	Core	Expression evaluation broken on longwood/trunk
33048	Core	user added header data will disappear if Content-Type is set to ""(empty string)
33248	Core	Add support for HttpOnly cookies
33572	Core	Memory access violation with ACTIVEX: ProgId=Excel.Sheet
33847	Core	Silent crash loading certain heavy applets with both 7.0 & 8.0 installed (linux)
33315	CPA	CPA throws StackOverflowException when the project has a class having many class variables
33419	Document	There is no description about ZlibException in the documentation
33571	Document	CastException when using PixelDistance as width of TableColumn
33486	Graphics	win64:Can not hear a sound
33523	Graphics	NDE creating ActiveXObject for excel file with initial-url specified
33823	Graphics	graphics update shows memory leak on Mac
33850	Graphics	Mac: graphics snapshot transmission can endlessly block
26761	GUI	TextField allows selecting using the right mouse button
26772	GUI	message display content removed unexpectedly
28205	GUI	Disabled item in checkbutton style ListBox can handle Action event.
28211	GUI	Invalid row entry in RecordSetDisplay navigation panel remains on FocusOut
28242	GUI	undo / redo not implemented for skinnable ComboBoxes
30284	GUI	ListBox selects non-selectable item if that is ListBox's first item
30401	GUI	The last item in ListBox cannot be shown completely when selecting.
28242	GUI	undo / redo not implemented for skinnable ComboBoxes
29741	GUI	Security issue with Clipboard.set-string and Clipboard.set-object
30618	GUI	Tooltip is not stylable
30661	GUI	Page up and Page down are not supported in menu which contains scroll bar.
30705	GUI	Mac: "on-pointer-motion" cannot set the cursor type
30717	GUI	Difficult to change Dialog/ValidationController missing fields error message
30743	GUI	Long list item squeezes the scroll buttons in the dropdown display of DDL and CB
30900	GUI	RecordModified should include field where possible
30916	GUI	MenuButton dropdown may be positioned too far from the dropdown button
33459	GUI	win64: cannot choose-file
33485	GUI	BasicRecordSet error adding RecordData with values not in fields
33494	GUI	CsvRecordSet uses unix line endings
33495	GUI	CsvRecordSet.write-record overriding advice is incorrect
33081	Install	showing tooltip will lead to FileNotFoundException error if language/locale settings of CDE and RTE are different.
33492	Install	32bit installers sometimes fail in installation on windows
33513	Install	Linux:cannot install Curl RTE
33598	Install	panic when uninstalling occ applet from "Add and Remove Programs" Dialog on Windows
32998	Plugin	When Firefox is used, the change in the Curl applet might not be reflected.
33068	Plugin	HttpTextInputStream.read-* cannot get body data when server returns 401
33478	Plugin	Mac: Safari Applet.browse-backward doesn't work
33510	Plugin	Linux: FireFox Applet.browse-backward doesn't work
33573	Plugin	Browser-resident http (BRHTTP) issue with 64bit windows
33680	Plugin	Mac: Firefox 4.0 crashes after running Curl applet
31285	Stdlib	documentation of HttpException thrown by set-insecure-http-cookie

Bugs fixed in CDE for 8.0.1000 release (Total:32)

Bug ID	Category	Summary
2279	CDE	Curl editors should display doc forms differently than code
24620	CDE	debugger shows partial file from break point
24956	CDE	add curl:// to location of a component in manifest could cause SurgeLab Internal Error
25140	CDE	temp files left behind when project files cannot be written
29215	CDE	Editor – “Open Definition” and “Definition” menu item are enabled when current editor selection is not valid
29503	CDE	Start file can be still found in the selection list of Run configuration after the file is deleted.
32637	CDE	Editor – bracket is inserted at a wrong position when hit return
32909	CDE	Error dialog cannot be closed except restarting Eclipse.
32932	CDE	NPE when adding a new source file to closed project
32959	CDE	Error happens after renaming the project name with some unsaved changes in VLE.
33104	CDE	NPE happens when opening tooltip by Ctrl+space in curl files not in manifest
33209	CDE	code assistant sometimes doesn't work with user defined package name
33267	CDE	Working Set – When project of Working Set is closed, project is deleted from Working Set
33275	CDE	Library Repository – library installed in list of Libraries isn't displayed
33296	CDE	Library Repository – IOException occurs when an invalid location is set
33384	CDE	Breakpoint on Paths with curly braces don't work
33385	CDE	Deployment – internal error when no installed IDE version matches RTE
33397	CDE	Editing definition of dll-method cause internal error
33409	CDE	Location field should check validity of path name in target settings dialog.
33424	CDE	Deployment – internal error when target's location is an invalid folder name
33426	CDE	name in a macro definition is not colorized in Curl Editor
33503	CDE	Doc string background color should be in syntax highlighting preferences
33593	CDE	Problems pane – double-click error in problem pane cannot jump to Curl Editor
33616	CDE	'Component target' label decoration doesn't show when Curl package presentation is in hierarchical mode
33621	CDE	UML export – super-class isn't exported
33634	CDE	Refactor-rename – After Curl project is renamed, only start.curl is shown in Breadcrumb
33666	CDE	cannot install cde with eclipse3.5.2
33689	CDE	Double-clicking a directory in Project Explorer cause error
33700	CDE	doc-next background – NPE occurs when doc-next background is set
33726	CDE	InvocationTargetException occurs when two or more packages are deleted
33766	CDE	Call Hierarchy: Field Accesses don't work for global variables(Only Eclipse3.6.2)
33771	CDE	Refactor – “Change API version” could fail with Curl remote exception
